A CRM APPLICATION FOR THE CHAI SHOP & CO

1. INTRODUCTION

Project Overview :

The project “A CRM Application for TheChaiShop&Co” focuses on developing a Salesforce-based Customer Relationship Management (CRM) system to manage customer, employer, and enterprise accounts efficiently. The system automates sales processes, maintains customer records, generates reports, and improves customer engagement through automated notifications.

The project user story and objectives are defined in the initial section of the document

Purpose:

The purpose of this project is to:

- Stream line customer relationship management
- Automate billing and order calculations
- Improved data accuracy
- Enabled data-driven decision-making
- Enhance customer engagement through email automation

Problem Statements – TheChaiShop&Co CRM Application

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1		Manage customer orders and billing	Calculations are often incorrect	Order quantity and billing are manual	
PS-2	 Sales Representative	Monitor sales and customer records	Reports are delayed and incomplete	Data is stored in multiple files	Stressed and inefficient
PS-2		Monitor sales and customer records	Reports are delayed and incomplete	Data is stored in multiple files	Confused and dissatisfied
PS-3	 Customer	Receive personalized offers and updates	I do not get timely notifications	There is no automated communication	Disconnected and undervalued

EmpathyAnalysis

Aspect	Description
Think&Feel	Needaccuratecustomerdataandreports

Hear	Feedback from management
See	Multiple registers and spreadsheets
Say & Do	Enter data manually
Pain	Errors, delays, data loss
Gain	Automation, fast reports

Brainstorming

Brainstormed Ideas

- Manual CRM system
- Excel-based management
- Web-based CRM
- Salesforce-based CRM
- Automated email system

2. REQUIREMENT ANALYSIS PHASE

Customer Journey Map

Journey Stages:

- Login
- Access CRM Application
- Enter Customer Data
- Calculate Bills
- View Reports
- Decision Making

Non-Functional Requirements

NFR-1: Usability

The system should be easy to use for sales representatives, managers, administrators, and analysts without requiring technical training.

Requirements:

- Simple and intuitive user interface
- Clear navigation menus
- Easy-to-understand forms
- User-friendly dashboards

Example:

A new sales employee should be able to login, enter customer details, and generate orders within a few minutes without help.

Salesforce Lightning UI provides drag-and-drop features and easy navigation.

NFR-2: Security

The system must protect customer and business data from unauthorized access.

Requirements:

- Role-based access control
- Secure login authentication
- Encrypted data storage

- Database backup and recovery

Examples:

- Profiles and permission sets
- Object-level and field-level security
- Restricted billing access
- Secure login and password policies

NFR-3: Reliability

The CRM system should work correctly at all times and store data accurately without loss.

Requirements:

- Automatic data saving
- Regular system backups
- Error handling mechanisms
- Stable cloud environment

Example:

If a user enters order data and the internet disconnects, the system should save the information and restore it later.

Salesforce cloud ensures automatic backups.

NFR-4: Performance

The system should respond quickly and handle large amounts of data efficiently.

Requirements:

- Fast page loading
- Quick report generation
- Smooth dash board rendering
- Minimal delay

Example: When a manager generates monthly sales reports for hundred of customers, the report should load within 2–3 seconds.

Optimized queries and caching improve speed.

NFR-5:Availability

The system should be accessible when ever required.

Requirements:

- 24/7system availability
- Minimal downtime
- Cloud-based hosting
- Disast error very

Example: Managers should be able to access the CRM system during peak business hours, weekends, or late nights.

Salesforce cloud provides high uptime.

NFR-6:Scalability

The system should support business growth without affecting performance.

Requirements:

- Ability to handle more users
- Support increasing customer data
- Expand ablest or age
- Maintain system speed

Example: If The ChaiShop & Co expands to multiple branches, the CRM system should support thousands of customers without slowing down.

Salesforce infrastructure automatically scales.

Data Flow Diagram

User → Salesforce UI → Custom Objects → Validation Rules → Flows → Reports
→Dashboards.

- Generate Orders
- Calculate Bills

- View Reports
- Decision Making

What you'll learn

1. Real Time Salesforce Project
2. Standard and Custom objects
3. Pick list Value sets
4. Types of Fields & their relationships.
5. Page Layouts
6. Record Types
7. Validation Rules
8. Email Templates
9. Flows
10. Reports and Dashboards.

Implementation

Milestone1-

Salesforcedeveloperaccountcreation:Activity 1:

Creating Developer Account:

1. Go to <https://developer.salesforce.com/signup>
2. On the sign up form, enter the following details :

Build enterprise-quality apps fast to bring your ideas to life

- Build apps fast with drag and drop tools
- Customize your data model with clicks
- Go further with Apex code
- Integrate with anything using powerful APIs
- Stay protected with enterprise-grade security
- Customize UI with clicks or any leading-edge web framework

Sign up for your Salesforce Developer Edition
